22136 Old Alturas Road, Redding, CA

PROFESSIONAL SUMMARY

Computer Science graduate with experience in systems programming, applying large language models, and performance research; including building edge machine-learning-powered tooling and benchmarking multithreaded performance. Ready to contribute to safe, beneficial AI.

TECHNICAL SKILLS

Languages: Python, TypeScript, Rust, C/C++, SQL, HTML/CSS

Frameworks & Libraries: YOLO, WebLLM, LangChain, Rayon, OpenMP, pthreads, ROS2, TailwindCSS, CUDA

Tools & Platforms: Docker, Proxmox, Linux, Git, WebGPU, REST APIs, VSCode

PROJECTS

Performance Research | Debugging and Systems | Natural Language LLM integration - Brainrot Or Not | Small-Scale Infrastructure Management

Performance Research | Rust, C, pthreads, OpenMP, Python, Quarto

- Conducted a comparative performance analysis of multithreading implementations in Rust and C for numerical integration.
- Authored a professional research report with Python and Quarto, detailing methodology and presenting performance benchmarks.

Debugging and Systems | People-Following Robot | Python, ROS2, Intel RealSense, YOLO, CUDA

- Programmed an autonomous robot using Robotis kits and ROS2 to track and follow a person via a depth camera and custom machine learning models.
- Resolved complex library compilation and hardware interfacing challenges across Nvidia Jetson, Raspberry Pi, and CUDA-enabled Ubuntu systems.

Natural Language LLM integration | Braintrot or Not - YouTube Video Classifier | TypeScript, WebGPU LLM

- Developed a Chromium extension that uses a locally-run LLM via WebGPU to analyze video transcripts and determine educational value.
- Built a backend service to fetch and process YouTube video metadata (transcripts, titles) for the LLM analysis pipeline.

Small-Scale Infrastructure Management | Proxmox Home Lab & Virtualization Server | Proxmox, RAID, Docker

- Built and maintain a personal virtualization server for cloud backups, password management, and development environments.
- Configured hard drives in a RAID array to ensure data redundancy and safety for critical personal services.

EXPERIENCE

Real world technology support | Troubleshooting | Customer Support

Office Technology Technician | Carrel's Office Solutions (Redding, CA) | Jun 2022 – Jun 2023

- Diagnosed and repaired copier hardware for government and small-business clients, maintaining operational continuity.
- Configured network settings (IP, Active Directory) to integrate devices into client Windows environments and resolve connectivity issues.

EDUCATION

California State University, Chico

Aug 2024 – May 2026

- Bachelor of Science in Computer Science
- Minor in Mathematics

Shasta College

Aug 2022 – Jun 2024

- AS General Studies-Social Sciences
